November 1st. 1860. For the Mississippian. THE DIAMOND DING.

A simple thing This little ring-That encircles my finger, Bright diadems Of memory doth linger. And from its leaves

My fancy weaves, A strong vestment for the beart ; Tis made of love, True woman's love That with life can ne'er depart.

Oft from its face My thoughts will trace The fund hopes of other years; That rose too bright To set in night, Leaving what? a ring and tears

Yet go west hope As bads toat ope To see the dawn's first glowing Their leaves so sweet The sun will greet

To blight them, in his going! II. Oh! then bright ring, Thou simple thing, Thy coming was a token, That hear's so warm, Must mee a storm

And yield, or else die broken

The attention of Printers and Publishers is a newly invented type metal.

New York, October 5, 1860.

G. H. Vinton, Esq.—Drak Six: We enclose a few ems cast from Counter's Unequalied Hard Type Metal—large quantities of which are now being in made up, preparatory to the inauguration of our new boilding.

The type can be driven through a board, or into it any other type manufactured in this country, and no Type now made can be driven into it without breaking its face down like antique, whilst the hair lines on ours will remain perfect. You can whittle the corners of any other type with this of ours—you can break a tenpency nail with flagers as easy as you can it—it cuts like annealed steel.

Try it—brag of it, and if necessary bet from 100 to 1,000 dollars that no other type metal in the country equals it.

Call the attention of Printers to its balue, for really this new metal is one of the greatest efforts we have yet made for the benefit of Printers.

We think it will at least equal any copper-faced type.
